Empathy Map

Create an empathy map to understand the customer/user of the AI FAQ Assistant API from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem addressed by the project. This helps the team build a user-centred FAQ solution.

SAYS • "I want quick answers to common questions." • "The API should be easy to use." • "I don't want to search through many pages."		THINKS • "Will the answer be accurate?" • "Can I integrate this API easily?" • "Is my request handled securely?"
	Divya R Mageshwari S Padmaja B Rabyathul Basarya M	
DOES • Sends FAQ questions through the API. • Checks the returned answer. • Uses the response in a website or application.		FEELS • Frustrated by repeated manual searches. • Wants confidence in the response. • Satisfied when answers are fast and relevant.
