Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

S.No	Item to Submit	What you should provide
1	Complete source code (all files and folders)	Your complete project source-code folder
2	README / Setup Guide	Steps to install, configure, run, and use your project
3	requirements.txt / package.json / dependency file	The dependency file according to your technology
4	Database schema / seed files (if applicable)	Database tables/schema and sample/seed data, if your project uses a database
5	Environment configuration file (.env.example or similar)	Example environment variables/configuration needed to run the project
6	Deployed application URL (if hosted)	Your live application URL, if you have deployed it
7	APK / Executable binary (if applicable)	APK for Android or executable file for desktop applications
8	Dockerfile / Containerization config (if applicable)	Dockerfile and related configuration, if Docker is used
9	Test files and test results	Test cases, test scripts, and testing results
10	Demo video or walkthrough (if required)	Project demonstration video/link, if your submission requires one

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	N/A
Login Credentials (Demo)	"name": "Priya Sharma", "email": "priya@writeflow.com", "password": "securepassword123"
Platform / Hosting Provider	Localhost / VS Code

Repository Link	https://github.com/dpmr-123/AI-FAQ-NM-PROJECT
Demo Video Link	https://drive.google.com/file/d/11AytiD9crM6pm25euHHNG3JRg2Yv_dGj/view?usp=drivesdk

Step 4: Run Instructions

Step	Instruction
1	Download / clone the project source code.
2	Install the required dependencies.
3	Configure the .env file with required settings.
4	Set up the database and run the required scripts.
5	Start using the project run command.
6	Open terminal for execution using Thunder client.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	No dedicated frontend dashboard is included.	API can be tested using Postman / Thunder Client.
2	Search currently uses keyword-based matching.	Semantic/vector search can be added in future.
3	AI-generated FAQs require human review before publishing.	Review the generated content before saving it.
